

TECHNICAL DATA SHEET

Product Code	CFA-004
Product Description	Solvent based Paint Stripper for the removal of paints and varnishes.
Intended Uses	A highly effective stripper for removal of all common types of coatings such as allyd enamel paints and varnishes, nitrocellulose and acrylic lacquers, alkyd stoving enamels and waterbased emulsion paints.
Features & Benefits	- Suitable for use on metal, timber and concrete surfaces - Gel formula is suitable for vertical surfaces
Product Information	Appearance: Semi Opaque Density: Approx. 1.13 kg/lit Viscosity at 23°C: 70 - 75 KU Flash Point: Non – Flammable Active ingredients: Methylene Chloride This product is manufactured under strict SABS ISO 9001 : 2015 quality standards.
Application Details	Mixing: Shake well before use. Method: Paint brush or block brush and stripping knife. Thinning: Not Recommended Conditions: Application is tested at 23°C in climate-controlled environment Cleaning of Equipment: After use, remove as much product as possible, and then clean immediately with Prostar Lacquer Thinners.
Application	- Pour enough ProStrip for immediate use into another container, which will accommodate the paint brush or block brush and close the container tightly to avoid evaporation of active ingredients. - Apply briskly by brush in heavy layers covering small manageable areas at a time. Avoid overspreading into thin layers since this will reduce its efficiency. - Allow approximately 5 minutes reaction time to ensure that the coating has blistered thoroughly, or is sufficiently soft to be removed. Then remove the coating by stripping with a paint scraper or putty knife. Use steel wool or hard bristles brush in difficult to reach places, such as mouldings or profiles. - NOTE: Emulsion paints will soften, not blister like enamels, lacquers and vanishes. - Where old paint layers are very thick, repeated applications of Prostar Prostrip may be necessary. - After stripping it is essential to remove all paint stripper residues. If allowed to remain on the surface the waxes contained in the stripper will interfere with the drying and adhesion of subsequent coats of paint or varnish. - On wood, hardboard, chipboard: Wash with Prostar Lacquer Thimnners.. - On metals: Clean with Prostar Degreaser and rinse thoroughly with fresh water. - On masonry: Scrub down with a strong warm Prostar Sugar soap Powder - Rinse thoroughly with fresh water. - Allow cleaned surfaces to dry thoroughly and sand well to ensure a perfectly clean surface for recoating.
Precautions	- Contents may be under pressure, open cap with caution to prevent any splashing. - Do not apply to hot surfaces. - Not suitable for use on plastics and fibre glass surfaces.
Safety Precautions	- Keep out of reach of children. - If product is ingested seek immediate medical advice. - In case of eye contact seek medical attention. - Always ensure good ventilation during and after application - Ensure that product is stored in a cool dry. - Do not smoke while painting. - Wear a suitable dust mask if sanding. - To avoid any risk of spillage, always transport in a secure upright position.
Storage Conditions	- Store in a cool, dry place away from direct sunlight or extreme cold. - Open containers should not be stacked

Disclaimer:

The recommendations contained herein are given in all good faith and are meant to guide the specify or the user. They are based on results gained from our tests and experiences and are believed to be reliable. No Guarantee is implied by the recommendations contained herein since conditions of use, method of application and cleanliness of the substrate prior to painting are beyond our control.

NB: Technology may change with time necessitating changes to this Technical Data Sheet (TDS). It is the responsibility of the user to ensure that the latest TDS is being used.
